

Hong Kong Branch Visiting Scholar Seminar

Nitrogen fixation in the northeastern South China Sea under the influence of 2015/2016 super El Niño

Dr. Jiaxing Liu

Visiting Scholar of HKB Prof. Hongbin Liu's Lab
Assistant Researcher
South China Sea Institute of Oceanology,
Chinese Academy of Sciences

Highlights: When and why do the diazotrophic cyanobacteria bloom in the coastal ocean? This question drives the team to conduct field investigations and bioassay experiments in the coastal area of the northeastern South China Sea. Dr. Liu will share his discovery about the joint effect of Kuroshio, upwelling and eddy on the diazotrophic cyanobacteria bloom.

 **4 April 2022 (Monday)**
4:00 - 5:00 pm (GMT +8, HKT)
